Situation Debriefing

Welcome to FreeDum Fighters, where the fate of the Memerealm hangs in the balance! On one side, MAGATRON, the mechanized MAGA overlord, fights to Make Memes Great Again.

On the other, KamaCop 9000, the shadowy progressive AI, plots a rebellion to restore “order.” The grand prize? Absolute meme supremacy and the ultimate control of inefficient government spending (because apparently, that’s a prize now).

Thankfully, this battle rages in an alternate dimension, sparing us from total annihilation—though let’s be honest, Earth wouldn’t notice. Thanks to revolutionary Cryptoquantum tech, we’ve temporarily bridged the gap between worlds, letting you join this absurd spectacle of political chaos.

So, grab your \$DUM, pick your overlord, and fuel the war machine. Will you help MAGATRON dominate the galaxy or sneakily fund KamaCop’s underground uprising? Either way, you’re “voting” with memes—because nothing says democracy like staking tokens.

Project Overview

FreeDum Fighters is a satirical token project blending modern politics, meme culture, and blockchain mechanics. Set in the chaotic Memerealm, it pits MAGATRON (a mechanized Donald Trump leading the Red Coalition) against KamaCop 9000 (a rebellious AI leading the Blue Syndicate).

Through staking rewards, social media gameplay, and narrative storytelling, users shape the Memerealm's future by backing MAGATRON's global domination or KamaCop's underground resistance.

This project offers humor, satire, and a fresh take on blockchain, appealing to meme enthusiasts, crypto investors, and fans of creative engagement.

Tokenomics

The total supply of \$DUM tokens is set at **270,000,000,000**, a shout-out to the amount of votes one of our FreeDum Fighters will need to win.

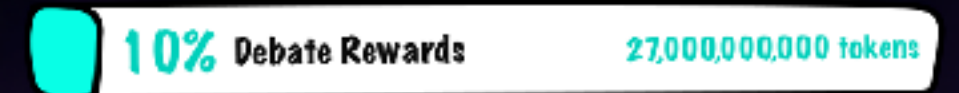

This represents 100% of the total supply, distributed across various allocations to support the project's growth, development, and community engagement.

54,000,000,000 tokens will be allocated to the liquidity pool to ensure sufficient liquidity for trading on decentralized exchanges (DEXs), facilitating smooth and efficient transactions for all participants.

108,000,000,000 tokens will be made available during the presale phase. This allocation aims to raise initial funding and distribute tokens to early supporters, allowing them to become integral members of the community.

We have allocated 27,000,000,000 tokens to provide necessary covert government funding. This allocation will go towards rewarding the winning parties after each debate week.

Tokenomics

20 % Staking Pool

54,000,000,000 tokens

Park your \$DUM for a while, and watch it grow—like a political promise, but better! To incentivize long-term holding and network security, 54,000,000,000 tokens are designated for staking rewards. Token holders can stake their tokens to earn additional rewards, supporting the stability and decentralization of the project.

10% Everything Else

27,000,000,000 tokens

The remaining 27,000,000,000 tokens are set aside for various purposes, including:

1

Centralized Exchange (CEX) Listings:

To facilitate listings on major CEXs, increasing accessibility and market reach.

2

Rewards and Incentives:

For community rewards, including event participation, community engagement, and other incentives.

3

Airdrops:

For use in specific marketing and other community support-related campaigns.
